EXAMINER

SHERR, CRISTINA O

ART UNIT PAPER NUMBER

3621

DATE MAILED: 05/07/2003

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application N .

09/362,982

Applicant(s)

SHINICHI TANIGUCHI

Examiner

Cristina O Sherr

Art Unit

3621

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 January 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-20 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____.
- 4) ☐ Interview Summary (PTO-413) Paper No(s). _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

DETAILED ACTION

1. This action is in response to Applicant's communication received 29 January 2003. Claims 1 – 20 are pending in this action.

Response to Arguments

2. Applicant's arguments with respect to claims 1 - 20 have been considered but are moot in view of the new ground(s) of rejection.

Priority

3. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Japan on 19 October 1998. It is noted, however, that applicant has not filed a certified copy of the original Japanese application as required by 35 U.S.C. 119(b).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1 – 7 and 10 - 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Hoshino et al (US 6,088,680A).
6. Regarding claim 1 –

Hoshino discloses a vehicle-mounted communication device comprising:
transmitting/receiving means provided for communication of information with road- side
communication means located at a road side; and relay means for relaying encryption
information received from the road side by said transmitting/receiving means to an IC
card which includes storage means for storing user information regarding a balance of
charges and which also includes encryption means that encrypts and outputs output
information based on the user information and decodes encrypted input information
regarding the user information (Col 3 In 6 – col 6 In 28).

7. Regarding claim 2 –

Hoshino discloses a vehicle-mounted communication device according to claim 1,
wherein said relay means relays the output information encrypted by the IC card to said
transmitting/receiving means (Col 3 In 6 – col 6 In 28).

8. Regarding claim 3 –

Hoshino discloses a vehicle-mounted communication device according to claim 1,
further comprising encryption information storage means in which the encryption
information is temporarily stored, wherein said transmitting/receiving means stores the
encryption information in said encryption information storage means and transmits as is
the encryption information stored in said encryption information storage means (Col 3 In
6 – col 6 In 28).

9. Regarding claim 4 –

Hoshino discloses a vehicle-mounted communication device according to claim 1,
wherein at least one of the IC card and the road-side communication means outputs a

portion of the output information in a state without encryption and information display means for displaying the portion of the output information outputted without being encrypted is further provided (Col 3 ln 6 – col 6 ln 28).

10. Regarding claim 5 –

Hoshino discloses a road-to-vehicle communication device comprising a vehicle-mounted communication device according to claim 1; and road-side control means being located at a road side, including road-side communication means provided for intercommunication of information with the vehicle-mounted communication device, and also including road-side encryption means for encrypting transmitted information and decoding received information (Col 3 ln 6 – col 6 ln 28).

11. Regarding claim 6 –

Hoshino discloses a road-to-vehicle communication device according to claim 5, wherein road-side encryption means of said road-side control means installed at an entrance gate effects encryption of transmitted information and road-side encryption means of said road-side control means installed at a toll reception gate effects only decoding of received information (Col 3 ln 6 – col 6 ln 28).

12. Regarding claim 7 –

Hoshino discloses a road-to-vehicle communication device according to claim 5 wherein the transmitted information is accounting information regarding accounting processing of charged facilities (Col 3 ln 6 – col 6 ln 28).

13. Regarding claim 10 –

Hoshino discloses a vehicle-mounted communication device according to claim 2, further comprising encryption information storage means in which the encryption information is temporarily stored, wherein said transmitting/receiving means stores the encryption information in said encryption information storage means and transmits as is the encryption information stored in said encryption information storage means (Col 3 In 6 – col 6 In 28).

14. Regarding claim 11 –

Hoshino discloses a vehicle-mounted communication device according to claim 2, wherein at least one of the IC card and the road-side communication means outputs a portion of the output information in a state without encryption and information display means for displaying the portion of the output information outputted without being encrypted is further provided (Col 3 In 6 – col 6 In 28).

15. Regarding claim 12 –

Hoshino discloses a vehicle-mounted communication device according to claim 3, wherein at least one of the IC card and the road-side communication means outputs a portion of the output information in a state without encryption and information display means for displaying the portion of the output information outputted without being encrypted is further provided (Col 3 In 6 – col 6 In 28).

16. Regarding claim 13 –

Hoshino discloses a road-to-vehicle communication device comprising: a vehicle-mounted communication device according to claim 2, and road-side control means being located at a road side, including road-side communication means provided for

Art Unit: 3621

intercommunication of information with the vehicle mounted communication device, and also including road-side encryption means for encrypting transmitted information and decoding received information (Col 3 ln 6 – col 6 ln 28).

17. Regarding claim 14 –

Hoshino discloses a road-to-vehicle communication device comprising:

a vehicle-mounted communication device according to claim 3, and

road-side control means being located at a road side, including road-side

communication means provided for intercommunication of information with the vehicle-mounted communication device, and also including road-side encryption means for

encrypting transmitted information and decoding received information (Col 3 ln 6 – col 6 ln 28).

18. Regarding claim 15 –

Hoshino discloses a road-to-vehicle communication device comprising:

a vehicle-mounted communication device according to claim 4, and

road-side control means being located at a road side, including road-side

communication means provided for intercommunication of information with the vehicle-mounted communication device, and also including road-side encryption means for

encrypting transmitted information and decoding received information (Col 3 ln 6 – col 6 ln 28).

19. Regarding claim 16 –

Art Unit: 3621

Hoshino discloses a road-to-vehicle communication device according to claim 6, wherein the transmitted information is accounting information regarding accounting processing of charged facilities (Col 3 ln 6 – col 6 ln 28).

20. Regarding claim 17 –

Hoshino discloses a vehicle-mounted communication device according to claim 10, wherein at least one of the IC card and the road-side communication means outputs a portion of the output information in a state without encryption and information display means for displaying the portion of the output information outputted without being encrypted is further provided (Col 3 ln 6 – col 6 ln 28).

21. Regarding claim 18 –

Hoshino discloses a road-to-vehicle communication device comprising:
a vehicle-mounted communication device according to claim 17, and
road-side control means being located at a road side, including road-side communication means provided for intercommunication of information with the vehicle-mounted communication device, and also including road-side encryption means for encrypting transmitted information and decoding received information (Col 3 ln 6 – col 6 ln 28).

22. Regarding claim 19 –

Hoshino discloses a road-to-vehicle communication device according to claim 18 herein road-side encryption means of said road-side control means installed at an entrance gate effects encryption of transmitted information and road-side encryption means of

Art Unit: 3621

said road-side control means installed at a toll reception gate effects only decoding of received information (Col 3 ln 6 – col 6 ln 28).

23. Regarding claim 20 –

Hoshino discloses a road-to-vehicle communication device according to claim 19, wherein the transmitted information is accounting information regarding accounting processing of charged facilities (Col 3 ln 6 – col 6 ln 28).

24. Claims 8 - 9 are rejected under 35 U.S.C. 102(e) as being anticipated by Hoshino et al (US 6,088,680A).

25. Regarding claim 8 –

Hoshino discloses a road-to-vehicle communication device comprising: road-side control means being located at a road side, including road-side communication means provided for intercommunication of information with vehicle-mounted communication means, and also including first encryption means for encrypting transmitted information and decoding received information, with a first electronic key; information control means including information transfer means which stores therein user information regarding at least one of a vehicle and a user and through which information is mutually transferred with respect to the vehicle-mounted communication means, and also including second encryption means for encrypting output information and decoding input information, with a second electronic key; and vehicle-mounted control means being installed on a vehicle side, including vehicle-mounted communication means provided for intercommunication of information with respect to the road-side communication device and for mutual transfer of information with respect to said information control means,

Art Unit: 3621

and also including third encryption means which, during the communication of information, encrypts transmitted information and decodes received information with the first electronic key, and which during the transfer of information, encrypts output information and decodes input information with the second electronic key (Col 3 In 6 – col 6 In 28).

26. Regarding claim 9 -

Hoshino discloses a road-to-vehicle communication device according to claim 8, wherein each group of said first encryption means and the road-side communication means, said second encryption means and the information transfer means, and said third encryption means and the vehicle-mounted communication means are provided on the same substrate (Col 3 In 6 – col 6 In 28).

Conclusion

27. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

28. Hurta et al (US 5,602,919) discloses a speedup for monetary transactions using a transponder in conjunction with a smartcard.

29. Jesadanont (US 5,451,758A) discloses an automatic non-computer network no-stop collection of expressway tolls by magnetic cards and method.

30. Chaum et al (US 5,485,520A) discloses an automatic real-time highway toll collection from moving vehicles.

31. Shigenaga et al (US 5,554,984A) discloses an electronic traffic tariff reception system and vehicle identification apparatus.

32. Maeda et al (US 5,926,546A) discloses a communication device and system for mobile encrypted communication.

33. Examiner's note: Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant.

Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may be applied as well. It is respectfully requested from the applicant, in preparing the responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention as well as the context of the passage as taught by the prior art or disclosed by the examiner.

34. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cristina O Sherr whose telephone number is 703-305-0625. The examiner can normally be reached on Monday through Friday 8:30 to 5:00.

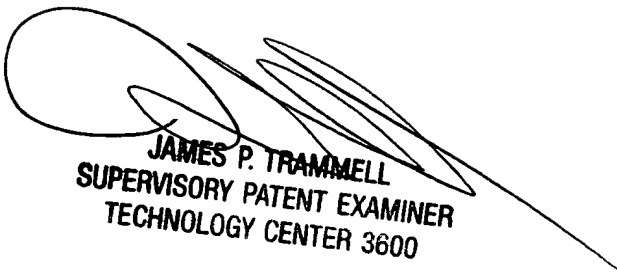

35. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Trammell can be reached on 703-305-9768. The fax phone numbers for the organization where this application or proceeding is assigned are 703-305-7687 for regular communications and 703-305-7687 for After Final communications.

36. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-3900.
